The Linear Sewing Machine

Today, many industries use highly specialized technical fabrics and require very specific, customized applications. With its broad range of sewing tools and accessories the SM-100-CA will create quality seams on an infinite range of fabrics, even on tough PVC-coated textiles, crystal (clear) PVC or fire-retardant fabrics.

Whether you produce awnings, sails, pool covers, tarpaulins, banners, wind barriers, or fire-retardant curtains, the SM-100-CA can be equipped with the accessories needed to meet your production requirements and deliver highly professional products.

Easy to use and extremely efficient, the SM-100-CA automatic linear sewing machine is a complete industrial sewing solution that will streamline your production and boost your manufacturing output.

Industrial sewing has never been this easy.
